Retail Segment Results

Revenues for the quarter ended April 30, 2013 increased \$42.6 million, or 25.5%, over the prior-year period to \$209.8 million. The year-over-year growth was driven by the significant expansion in same store sales and the five Conn's HomePlusTM stores opened in fiscal 2013. Two new stores opened on April 26, 2013. As of quarter end, 22 existing stores were updated to the Conn's HomePlus format.

The following table presents net sales by category and changes in net sales for the current and prior-year quarter:

The following provides a summary of items influencing the Company's major product category performance during the quarter, compared to the prior-year period:

- Home appliance average selling price rose 14.6% and unit volume increased 3.8%. Laundry sales increased 25.8%, refrigeration sales were up 16.2% and cooking sales rose 19.4%;
- Furniture unit sales increased 81.6% and the average selling price was down slightly;
- Mattress unit volume increased 33.6% and average selling price was up 19.7%;
- Same store sales of consumer electronics improved through the quarter. In April, same store sales were up 5.9%; and
- Tablet sales increased 218.0% and computer sales were up 16.2%.

Retail gross margin was 40.3% for the quarter ended April 30, 2013, compared to 33.7% in the prior-year period. Certain of the Company's vendors provide higher promotional assistance during the first quarter of each fiscal year which benefited retail gross margin by approximately 150 basis points in both periods. Margin improvement was reported in each of the product categories — reflecting the benefit of the sale of higher price-point, higher-margin goods and realization of sourcing opportunities. Product margin on furniture and mattress sales rose 6.1 percentage points from the prior-year period to 48.3% of sales. Furniture and mattress sales were 25.7% of total product revenue in the current period and generated 34.8% of the total product gross profit.

Credit Segment Results

Revenues were \$41.3 million for the current quarter, up 22.6% from the prior-year period. The revenue increase resulted from an increase in the average receivable portfolio balance outstanding. The portfolio balance rose to \$773.4 million at April 30, 2013, from \$635.2 million in the prior-year period, due to higher retail sales volumes and credit penetration over the past year. The portfolio interest and fee income yield was 18.0% for the three months ended April 30, 2013, relatively consistent with the prior-year period, but down 70 basis points sequentially as a result of increased short-term, no-interest financing.

Provision for bad debts was \$13.8 million for the quarter ended April 30, 2013, an increase of \$4.8 million from the prior-year period. This additional provision was driven primarily by the substantial year-over-year growth in the average receivable portfolio balance outstanding, which includes an increase of \$31.9 million during the current quarter.

Additional information on the credit portfolio and its performance may be found in the table included within this press release and in the Company's Form 10-Q to be filed with the Securities and Exchange Commission.

Capital and Liquidity

In March of 2013, the Company received an additional \$40 million of lender commitments under its asset-based loan facility increasing total commitments under the facility to \$585 million. During the first quarter, the Company also repaid the remaining asset-backed notes. In connection with the early repayment of the asset-backed notes, the Company accelerated the amortization of deferred financing cost resulting in an additional \$0.4 million of interest expense.

The Company's improved operating performance and credit portfolio velocity allowed it to internally fund the growth in its credit portfolio as well as capital expenditures. As of April 30, 2013, the Company had \$293.7 million of borrowings outstanding under its asset-based loan facility. Additionally, the Company had \$244.6 million of immediately available borrowing capacity as of April 30, 2013, and an additional \$45.3 million that could become available upon increases in eligible inventory and customer receivable balances under the borrowing base.

Outlook and Guidance

The Company increased earnings guidance for the fiscal year ending January 31, 2014, to diluted earnings per share of \$2.50 to \$2.65 on an adjusted basis. The following expectations were considered in developing the guidance for the full year:

- Same stores sales up 8% to 13%;
- New store openings of between 10 and 12;
- Retail gross margin between 37.5% and 38.5%;
- An increase in the credit portfolio balance;
- Credit portfolio interest and fee yield of between 18.0% and 18.3%, reflecting a higher proportion of the portfolio balance represented by no-interest credit programs than in fiscal 2013;

- Provision for bad debts of between 6.5% and 7.0% of the average portfolio balance outstanding;
- Selling, general and administrative expense of between 28.0% and 29.0% of total revenues; and
- Diluted shares outstanding of approximately 37.0 million.
