Dollars in thousands except average outstanding customer balance

⁽¹⁾ The quarter ended October 31, 2019 included error correction adjustments which negatively impacted interest income and fee yield by \$1.6 million or 40 basis points

⁽²⁾ Application data revised to conform calculation of approval status.

⁽³⁾ Credit scores exclude non-scored accounts

⁽⁴⁾ Three month rolling average of gross cash payments as a percentage of gross balances outstanding at the beginning of each month in the period. Fiscal year rate is for the full twelve month period.

⁽⁵⁾ The re-aged carrying value as of October 31, 2019 includes \$7.3 million in first time re-ages related to customers within FEMA-designated Tropical Store Imelda disaster areas.

FY21

- The static loss analysis presents the percentage of balances charged off, based on the fiscal year the credit account was originated and the period the balance was charged off. The percentage computed is calculated by dividing the cumulative amount charged off since origination, net of recoveries, by the original balance of accounts originated during the applicable fiscal year. Period 0 is the year of origination.
- The impact of the change in estimate for future sales tax recoveries was approximately 10 to 20 bps and was reflected in the net static loss rate for the quarterly period related to the three month period ending July 31, 2016 (period 6 for FY15 and period 2 for FY16).
- T represents the terminal loss percentage the point at which that pool of loans has reached its maximum loss rate.
- The origination amount includes sales taxes and other amounts that are not included in retail net sales.
- The FY15 and FY16 vintages include originated balances of higher quality equal pay no-interest ("EPNI") loans. In February of 2016, we discontinued originating this product and began to offer similar EPNI products through a third party partner, Synchrony Financial. Current cumulative loss rates excluding these higher quality EPNI accounts would increase the FY15 vintage from 14.1% to approximately 14.6% and the FY16 vintage from 14.9% to approximately 16.6%. We believe that these adjusted historical loss rates are more comparable to our more recent originations.
